I got a bachelor's degree in mechanical engineering of Qilu University of Technology in 1998. I worked over 20 years for multinational companies.

Since 1998 to 2000, I worked at the world - leading home appliances China company - Haier group in R&D design department.

Since 2000 to 2004, I worked at a Taiwanese company for international trading business.

Since 2004 to 2006, I worked at the world - leading fine chemistry Germany company - Basf for supply chain management.

Since 2006 to 2021, I worked at the world - leading garden machinery Germany company - ANDREAS STIHL for supply chain management.

Since 2021 I worked at the world - leading sunlight company – Parans for operation and international business.

As I have always been working in multinational enterprises with different job functions I have built up successful and professional communication and operation ability under different cultures.

I am a reliable, open-minded, resolute and optimistic person and would like to face more challenges to achieve more success.
